

RAISE  DONORS

Simplifying Payments AROUND THE GLOBE

150+ CURRENCIES ACROSS 50 MARKETS WORLDWIDE

Make sure you have all key features in place with your Authorize.net gateway!

RaiseDonors has partnered with EVO Payments to provide RaiseDonors customers with exclusive low processing rates, 24/7 customer support, and the payment industry's highest security standards.

To ensure you can launch your business and start accepting payments with EVO right away, we want to confirm you have everything ready to go on your Authorize.net gateway. The below gateway features should be enabled before you begin accepting credit card payments.

Authorize.Net Features at No Extra Cost

- Customer Information Manager (CIM) – card-on-file solution, which lets customers pay easily without re-entering payment details.
- Automated Recurring Billing (ARB) – accept and submit monthly recurring or installment payments from customers via their credit card or direct from their bank account.

Features Requiring Extra Cost

- eChecks – accept electronic checks in addition to credit cards. Expand your transaction options and get faster processing than with paper checks, with direct ACH payments from banks to your website.
- Account Updater – keeps card information up-to-date to avoid payment interruptions and lost sales.

For additional information on these features and associated pricing, visit:

www.authorize.net/sign-up/pricing/ and scroll down to the “Plan Features” section of the page.

You can also call Authorize.net directly at **1-888-323-4289**.
